Template – Test Smells Refactoring Experiment

Name: Sarah Ferreira da Silva

Project: bookkeeper (https://github.com/apache/bookkeeper.git)

I'm currently working on refactoring the following test smell:

constructor inicialization

My main difficulties in removing these anomalies were:

não tive dificuldades

I'm using the following refactoring methods to remove test smells:

setup external resource

From (0 to 10), how harmful is this test smell to the system? It's because ?
